

Aston University, in the School of Engineering & Applied Science, presents a One-day Course in the Main Building on Wednesday 13 May 2009

Conservation & Repair of 19th & 20th century R.C & steel framed historic buildings & monuments

The UK along with many other countries has an ageing built infrastructure and increasing numbers of 20th century buildings of architectural merit are being awarded historic listed status or are in conservation areas. Engineers, surveyors, building managers, owners and architects are increasingly required to maintain and repair such buildings and other large structures that have been awarded listed status by English Heritage or its equivalent bodies in other countries. This one day course will introduce the principles of conservation and its application to late 19th Century and early 20th century structures and materials with some interesting and high profile case histories from the Course Tutor's project portfolio. This course will be of interest to engineers, surveyors, building managers, owners and architects who are being required to investigate, maintain, repair and conserve such buildings and other large structures. Course Tutor Dr John P. Broomfield CEng, FICorr, FIM³.

- 09.00 - 09.45 **Registration**
- 09.45 - 10.15 **Principles of conservation**
- 10.15 - 11.00 **Deterioration processes**
- 11.00 - 11.15 **Coffee**
- 11.15 - 12.00 **Investigation methods**
- 12.00 - 13.00 **Repair Methods**
 - Coatings
 - Masonry and brick repairs
 - Concrete repair
 - Electrochemical treatments
- 13.00 - 14.00 **Lunch**
- 14.00 - 14.30 **Documentation**
- 14.30 - 15.00 **Maintenance**
- 15.00 - 15.15 **Tea**
- 15.15 - 16.45 **Case Histories**
 - Grade I listed wrought iron framed ship
 - Grade II listed steel framed Department Store
 - Grade II* listed terracotta gateway
 - Grade II listed R.C University buildings
